

WE CONNECT MEDIUM-SIZED BUSINESSES

IT'S TIME TO CONNECT

nicos secures the entire communication of globally operating medium-sized companies. We ensure reliable, high-performance IT infrastructure and protected collaboration between your locations worldwide.

As a **Managed Services Provider**, we connect your company locations through intelligent Wide Area Networks (WANs): from planning to setup and secure 24/7 operation of your entire network, you receive all services from a single source. The nicos 24/7 SOC with dedicated contacts is always there for you.

As a **Managed Security Services Provider**, we offer tailored solutions to ensure your network is optimally protected against cyberattacks. Always. Around the clock. 365 days a year.

As a **Strategic Partner** with expertise from about 25 years of market experience, we take full responsibility for your entire network.

nicos - PARTNER OF THE MEDIUM-SIZED SECTOR. We have the right solution for every requirement.

nicos Secure Connect – RELIABLY SECURE

Managed SASE/SD-WAN network solution with end-to-end security — the foundation of your digital communication. We provide network solutions with a globally standardized nicos 24/7 service concept and end-to-end Service Level Agreements (SLAs). From SD-WAN to SASE, whether on-premises, virtual, or hybrid, we design custom solutions tailored to your specific requirements. Carrier-neutral and technology-independent, we ensure maximum availability, security, and cost-efficiency.

nicos Managed Firewall - ON PREM & CLOUD-SECURITY

We configure and manage your firewalls — whether in the cloud (FWaaS) or with on-site perimeter security. We also support hybrid solutions. With our centralized monitoring system, we continuously ensure the functionality of your systems. Regular reports keep you updated. Necessary updates and rule adjustments? We handle them for you, of course.

nicos Digital Experience Monitoring - THE BEST DIGITAL EXPERIENCE

Transparency for the internet, cloud and network: nicos' centralized monitoring system oversees your systems in real time. Regular reports keep you informed. Our monitoring also tracks your endpoints and applications, providing seamless oversight of your entire network. This allows us to identify hidden issues in your communication chain that could cause prolonged downtimes.

nicos Cyber Defense – PREVENTION. DETECTION. REACTION.

As cyber security demands keep evolving, we consistently enhance our Managed Detection & Response Services portfolio. Our skilled cyber security experts design tailored packages for prevention, detection, and response to security incidents. This ensures prompt and effective implementation of risk-reducing measures, keeping your business fully safeguarded against cybercriminals — always.
